Floor tiles for heavy traffic areas(Equivalent to PEI 5).

VARIATIONS IN HUE

V1 - Slight variation: product with slight colour variation.

V2 - Medium variation: product with visible colour variation.

V3 - High variation: product with strong colour variation.

V4 - Very high variation: product with very strong colour variation.

ICONS

MATT SURFACE
Natural,not shiny surface finish.

MATT-GLOSS
Models with a design that combines a natural, non-shiny surface finish with shiny patches.

GLOSS SURFACE
Shiny surface finish with a high degree of light reflection.

METALLIZED
A finish that reproduces shiny metal surfaces(aluminum, steel,copper,silver,etc).

LUSTER
Gloss finish.

LUSTER GLOSS
High gloss finish, may or may not include metallic and sparkle.

FLOOR TILE
Tiles that can be used on floor and wall.

WALL TILE
Tiles that can be used on wall.

RECTIFIED
Tiles that have factory water jet cut edges. Name given to the finish of tiles dimensionally after firing. The process enhances the aesthetic quality of the setting created. Some may be bevelled.

GROUT REQUIRED
Models with this symbol (mainly mosaics and complementary tile pieces) need to be grouted across surface in channels.

FROST RESISTANCE
Tiles that resist freeze,thaw

STAIN RESISTANCE
Models marked with this symbol are resistance to stain to some degree.

CHEMICAL RESISTANCE
Models marked with this symbol are resistance to house-hold cleaning products, swimming pool salts, high concentration of acids and alkalis.

DEEP ABRASION RESISTANCE
A test to determine hardness of tile to resist scratching or abrasion of surface.

WATER ABSORPTION
The ability to resist moisture penetration/retension.

SLIP RESISTANT 'DIN' R9-R13
Surface determined to be resistant to slipping.

SLIP RESISTANT 'ASTM'
Coefficient of friction determined by 'static' test . ASTM C1028,min 0.60 as determined by ADA.

ECO TILE
Some recycled content,% varies by line.
